<b>Total Points</b>	76
<b>Comments</b>	<p>The team started really well on the challenge delivering well thought and researched outputs. The desk research is meaningful and well summarized. The fact that you interviewed 10 individuals will certainly help you with your empathy map assignment. However, your open questions to the challenge giver based on your research were not present in your repository. We are aware you participated on the slide, but it is important that you complete the assignments as instructed.</p> <p>All members are active on the GitHub and have been assigned “issues”. Continue to actively use this feature to organize your team’s workflow. The individual members of the team contributed to the team canvas, but more detailed information on the post-its or even beyond the canvas it self, to contextualize and summarize the main points would have enabled you to provide a more concise picture.</p>

## Assignment 2: Grade 4%: max. 40 points

<b>Total Points</b>	32
<b>Comments</b>	<p>The empathy map is rather brief described, taking a general perspective, rather than a persona. In your next assignments you can add more information / context to your assignment by writing a couple of paragraphs in additional to the framework.</p> <p>In what regards the problem statement, your final statement is really good to start the ideation, however your canvas contain only one post it per column. Hence, it does not demonstrate your rationale and ideation processes that led to the final chosen HMW question. It is always important you show the process and contextualize your assignments. Add information as text on your wiki. It will increase your chances of receiving full points for the next assignments.</p>

<b>Comments</b>	Great 1 <sup>st</sup> sprint. You have done a great initial development of your idea. You are using digital prototyping in a great way of communicating your idea. Teamwork looks great. You are using GitHub issues well. It looks a little odd to me (G. Socher) that you are almost always assigning everyone to an issue. Please be more active and verbose in commenting issues and describing issues. Keep up the great work.
